

ADVANCED DETECTION

 **NOTIFIER**[®]
by Honeywell

SPEED, STABILITY, & RELIABILITY

NOTIFIER's ONYX Series intelligent fire alarm systems respond rapidly to incipient fire signatures with unmatched precision. At the same time, they significantly reduce the occurrence of nuisance alarms. It's all made possible by NOTIFIER's ONYX Advanced Detection technology, which maximizes speed, stability, and reliability. ONYX Advanced Detection is comprised of two key elements: a set of complex software algorithms found in all ONYX Series fire alarm panels and a suite of advanced, specialty detectors. When used together, these elements extend ONYX Intelligent Sensing capabilities far beyond that of typical spot-type smoke or gas detection. From mission-critical applications where even a trace amount of undetected smoke is unacceptable, to environments where the presence of dust, moisture, or theater smoke is the norm, ONYX Intelligent Sensing is the answer.

NEW!

IntelliQuad™ PLUS – Combination Smoke and Carbon Monoxide (CO) Detector

NOTIFIER's IntelliQuad PLUS detector is a plug-in, addressable device that provides both fire and Carbon Monoxide (CO) detection. For fire, the detector combines four separate sensing elements in one unit (smoke, CO, infrared, and heat) to sense multiple components of a fire. This approach has enhanced sensitivity to real fire with heightened immunity to nuisance particulate. For CO, the detector's electrochemical sensing cell creates a separate signal for life safety CO detection. When used together with our addressable sounder base you can replace as many as four separate devices for a cleaner and more efficient installation.

MINIMIZE NUISANCE ALARMS

Cooperative Sensing Analyzes Readings from Multiple Devices

NOTIFIER's Cooperative Sensing Technology evaluates sensor readings from up to three adjacent smoke sensors to verify uniform smoke spread, a strong indication of a true fire condition. Based on the sensor data, the panel can quickly determine the difference between a real fire emergency and a nuisance condition.

Acclimate™ – Self-optimizes, Senses Heat and Smoke

The Acclimate Plus detector combines thermal and photoelectric technologies into a single device. It constantly monitors ambient heat and particulate conditions, adjusting sensitivity parameters and alarm thresholds automatically to maximize detection across a broad range of fire types.

HIGH SENSITIVITY FOR EARLY WARNING

VIEW™ Laser Detector – Super Sensitive Spot-type Detection

The VIEW laser smoke sensor is programmable to be up to 100 times more sensitive than standard photoelectric smoke detection technology. VIEW is ideal for critical applications where even a trace of undetected smoke is unacceptable or where high air flows can make traditional smoke detectors ineffective.

Customize Detector Sensitivity to the Environment, Day and Night

ONYX Advanced Detection offers nine levels of detector pre-alarm and alarm sensitivity settings. This allows users to optimize each detector's sensitivity specifically to its individual environment. Sensitivity levels are programmable to alternate automatically between day and night as occupancy changes.

Office Buildings

Areas of Concern

- Server Rooms
- Canteens / Microwave
- Shower Areas

Problems

- Early Detection
- Nuisance
- Nuisance, Humidity

Solutions

- VIEW, FAAST
- IntelliQuad
- Intelliquad

Typical Application

NFS2-640

FAAST
Aspiration
Smoke Detector

FSL-751
VIEW Detector

FSC-851
IntelliQuad
Multi-criteria Detector

Schools K-12

Areas of Concern

- Cafeteria Kitchen
- Locker Rooms
- Corridors outside Boiler Rooms

Problems

- Smoke / Humidity
- Humidity, Nuisance
- CO, Nuisance

Solutions

- IntelliQuad, Acclimate
- IntelliQuad
- IntelliQuad PLUS

Typical Application

NFS-320

FSC-851
IntelliQuad
Multi-criteria Detector

FCO-851
IntelliQuad PLUS with
Addressable Sounder Base

FAPT-851
Acclimate Plus
Detector

COMMON HAZARDS AND SOLUTIONS

Hospitals and Nursing Homes

Areas of Concern

- Operating Rooms
- Patient Rooms
- Server Rooms

Problems

- Very Early Warning
- Very Early Warning, Multi-Criteria, CO Detection
- Very Early Warning

Solutions

- VIEW, FAAST
- IntelliQuad PLUS
- VIEW, FAAST

Typical Application

NFS2-3030

Multi-criteria Detector

A WIDE RANGE OF SENSITIVITY

IntelliQuad™ – The Ultimate Multi-criteria Detector

IntelliQuad senses smoke particulates, carbon monoxide (CO), heat, and infrared signatures simultaneously to determine the presence of a fire condition. Sensor readings are continually evaluated against one another, allowing the detector to operate normally with high immunity to nuisance conditions, while quickly responding to true alarm events.

Aspirating Smoke Detection – Early Warning in Challenging Environments

Aspirating Smoke Detection (ASD) solutions provide early warning of an impending fire hazard. ASD can buy time to investigate an alarm and initiate an appropriate response to prevent injury, property damage, or business disruption. With a wide sensitivity range and multi-level warnings, even minute levels of smoke can be detected before a fire has time to escalate. It is also possible to connect the unit to the building's Ethernet connection in order to provide access and monitoring from anywhere in the world.

For over 60 years, NOTIFIER has been a leader in the fire alarm industry. Today, we are the largest manufacturer of engineered fire alarm systems with over 400 distributors worldwide, and regional support operations on every continent for the flexibility and options your business needs.

NOTIFIER - Leaders in Life. Safety. Technology.
